with suspense and suspicion A past that is slowly uncloaked revealing dark and horrific crimes that are haunting and driving alarming consequences in the present "Felicity crawls into the cupboard and wraps the duvet around her as she settles herself into the corner She balances the pillow against the wall and goes to sleep And finally like the last trace of a dream she remembers what the voice in her ear said to her He's coming" The story starts on the island of South Georgia close to Antarctica and home to the British Antarctic Survey BAS in the region Felicity Lloyd is a world expert glaciologist on a two year project on South Georgia to study the formation and movement of glaciers Towards the end of her first summer she gets and agitated as she anticipates the last tourist ship to dock before the Island goes into winter shut down Felicity's unrest is almost palpable as she waits to see the passenger manifest and if Freddie has finally tracked her down to this remote part of the world She has an escape plan prepared and when she finally sees Freddie she flees on a Rigid Inflatable Boat RIB to another small island Only Freddie saw her too and he is in pursuit I loved the location choices which worked so well in the story and the landscape of such a desolate island adds to the foreboding and chilling atmosphere of the story The ghosts of thousands of workers from a time when South Georgia hosted a massive whaling operation now echo in deserted settlements and half sunken ships The wind whistles through the rusted frames of buildings long past their usefulness Remaining for when the whales would return but they never did An eerie place that threatens unsafe dangers and now the added menace of a man that has tracked Felicity to the far ends of the Earth The next part of the story reverts back to Cambridge England nine months before Felicity takes up the position in South Georgia and she needs a clean bill of health and mental assessment from her doctor and her psychiatrist Dr Joe Grant is Felicity's psychiatrist but has just returned to work following the death of a patient who was obsessed with him Joe genuinely wants to help Felicity as he can see personality disorders but she just wants to get clearance as easy as possible so she can getaway Does she have a personality disorder is she being drugged or is someone playing games with her mind Meanwhile disappearances occur and strange alarming situations develop all handled brilliantly by Sharon Bolton The plotting is superb as the layers of complexity and supposition mount to provide an enthralling and captivating story The momentum of the novel is perfectly pitched and builds to a climactic conclusion It is also worth recognising the wonderful writing from Sharon Bolton as she crafts such vivid images and psychological turmoil I would highly recommend this book and I would like to thank Orion Publishing Minotaur Books and NetGalley for providing me with an ARC copy in return for an honest review Of interest Grytviken on South Georgia is where you find the grave of Sir Ernest Shackleton Hardcover 5 stars Lordy what a great read this is I am a mega Bolton fan and Ms Bolton has hit yet another one out of the ballpark The Split is a twisty eerie psychological thriller—vintage Bolton I burned out on typical psychological thrillers years ago You know the ones that feature amnesia missing children abusive husbands and traitorous friends and relatives But Sharon Bolton never fails to weave an intricate different sort of tale in which she beautifully transports the reader to an unusual setting and creates an atmosphere that is literally dripping in tension This one is based in Cambridge England and the remote Antarctic island of South Georgia Our protagonist Felicity is an expert in glaciers Not interested in glaciers? No problem Neither was I when I started See my star rating Amongst other interesting characters we have Freddie Freddie is after Felicity for uncertain reasons; Felicity lives in dire fear of Freddie Then there is Joe Joe is a psychiatrist who is trying to understand Felicity But Felicity has secrets that even she herself doesn't realize The story ultimately becomes a thrilling chase for survival in a terrifying milieu of ice water and misunderstandings Enough said If you have not read Sharon Bolton you haven't lived in the sense of reading quality thrillers She is one of my very top go to authors and I give my highest recommendation for her novels to all fans of thrillers and suspense Thank you Net Galley Minotaur Books and Ms Sharon Bolton for granting me an ARC of this novel Opinions are mine alone and are not biased in any way Hardcover I have a long list of books to read carefully stacked in proper order Then I get a book by Sharon Bolton And all my plans go out the window along with the list Every single time But here comes the hard part writing a review If you've read her stuff before you know you rarely end up where you thought you would I've learned to go in with a

healthy dose of paranoia Her plots are like those puzzles with 1000 tiles you never know which piece might change the whole picture In fact my tip for all her books is to go in knowing as little as possible just enjoy the ride So what do I share here without giving the game away? If I follow my own advice it would go something like this

Part 1 we meet the MC in a unique setting by 10% in I'm on high alert

Part 2 Change of place as we go back 9 months to get some history meet characters Stuff is happening and wait What?

Part 3 Ah some pieces are starting to click into place I got this It's the guy with the thing I knew it Oh no No no no

Part 4 Holeecrap Sorry what I meant to say was stuff happens my teeth are chattering and seriously? Followed by big finale Too much detail? Ok maybe I can expand a bit without spoiling any potential WTF moments

The story begins in South Georgia a small island between the Falklands Antarctica Felicity Lloyd is a glaciologist part of a small research team working for the British Antarctic Survey Their isolation is broken periodically by the arrival of cruise ships during the short tourist season And Felicity can't wait for it to be over Just one ship she'll be safe for another year We quickly realize two things about her This is a woman who's literally gone to the end of the earth to disappear And she's absolutely terrified of who may step off that ship That would be Freddie Lloyd her husband Unfortunately we already know where he's been where he is now When Felicity sees his name on the ship manifest her worst fear is realized But she prepared for this day long ago it's time to put her plan into action

The story is divided into 4 sections this first one is relatively short But boy does it set the tone The remote setting frigid weather Felicity's fear all of these are so well described you can feel them in your bones The tension is palpable the author has served notice you're in for an unsettling ride

Parts 2 3 are set in Cambridge beginning 9 months prior to present day Here we get some background on Felicity's life the people who crossed her path before she fled As part of the medical requirements for the position in South Georgia she has to get signed off by a therapist as fit for the job And so she meets Dr Joe Grant Joe is a mild mannered likeable guy with some interesting history of his own More characters plot lines are added in these sections A mysterious roller girl a troubled homeless man Joe's mother Delilah several others weave their stories into the mix Connections between them are slowly doled out as we continue to learn about Felicity's past That's it folks I'm determined to keep this spoiler free The stage is set for our return to South Georgia in part 4 by the time we get there I guarantee you'll have questions than answers There are tantalizing glimpses of where the story is going But contradictory unreliable versions of events make you feel like you're standing in quicksand Nothing is predictable you're never sure who you can trust or believe It's a psychological mind bender of a read that saves some of the best twists for last Sure you could argue a few moments stretch credibility conveniently propel the plot but its strength lies in the author's ability to create scenes so atmospheric that you feel you're walking in a character's shoes

If you're in the mood for something comfy cozy relaxing look elsewhere But if you want to spend a few hours on the edge you've found your next read

You can't hide from your secrets

Felicity Lloyd is about to breathe a big sigh of relief when the remote Island of South Georgia is about to have its last boat of the summer She has been anxiously searching the guest lists to make sure a certain name is not upon it She lives in fear that her ex husband Freddie will find her She is working on the remote island for two reasons 1 She loves what she does she's a glaciologist and 2 Freddie was just released from prison and she doesn't want him to find her But a therapist from Cambridge has been worried about Felicity He is on his way to the remote island to try and get to her before Freddie

This is a psychological thriller that begins on the remote island of South Georgia and then goes back nine months in time to Cambridge where Felicity is no longer the confident woman she is on the island of South Georgia She has been attacked and has no memory of who hurt her or why Referred to therapy she divulges that there are periods of time she cannot account for things have been moved in her home there are journal entries she doesn't recall making but really wants her therapist to sign off on her upcoming job in the Antarctic

I figured out a large portion of this book right away Not all of it but a significant portion Not even the tall glaciers in the Antarctic could get in my way of figuring out most of this book Sadly having figured some things out right away took away some of

my enjoyment and wanting to throttle her therapist at times didn't help Sure he's a likable enough guy but he can benefit from a class on ethics But Bolton did a great job of creating interesting characters especially Delilah the police investigator with pink hair I loved the harsh environment in South Georgia My favorite scenes were in the Antarctic I thought Bolton really nailed it I love it when the environment feels like a character in the book as well She really ended the book well in the frozen environment She obviously did her homework when preparing to write this book especially concerning Felicity's job and about glaciers and the landscape in South Georgia Although I did figure out a HUGE chunk of this book I did enjoy the pacing and how the plot unfolded She kept the book moving at a steady pace This was a hard book for me to rate I enjoyed it but was also feeling a little let down as well I had high hopes for this and when I finished felt conflicted I read this one fast as it was captivating and thought provoking Although I figured out a lot of the book there were still there were two reveals that I didn't see coming so I appreciated that and found it to be very clever In the end she did wow me with her descriptions vivid landscapes and interesting characters Thank you to St Martin's Press and NetGalley who provided me with a copy of this book in exchange for an honest review All the thoughts and opinions are my own Hardcover.
