

To Win and Die in Dixie: The Birth of the Modern Golf Swing and the Mysterious Death of Its Creator  
By Steve Eubanks Hardcover Interesting story of a golfing great that no one has ever heard of--  
however he too had trouble in the fidelity department--someone should write a book about athletes  
and that issue! Hardcover For golfing fans a must read. Hardcover

{site\_link} post a commentA fascinating biography of a forgotten golf legend a riveting whodunit of a covered-up killing a scalding exposé of a closed society—in To Win and Die in Dixie award-winning writer Steve Eubanks weaves all these elements into a masterly book that resurrects a superb sportsman and reconstructs a startling crime. Douglas Edgar was the British-born golfer who broke every record invented the modern swing and coached such winners as Bobby Jones the greatest amateur in history and Alexa Stirling the finest female player of her day. Cutting cinematically between Howell's present and Edgar's championship past To Win and Die in Dixie brilliantly portrays one man's quest for excellence and another's search for redemption and the truth. Filled with the vivid golf writing for which its author is renowned To Win and Die in Dixie is a real-life story both shocking and inspiring a book that propels Steve Eubanks to a new level of literary achievement,

Good golf history on the little known father of the modern swing good crime and Atlanta history also: Great unintentional golf lesson in here too I got my swing back after changing focus to swinging the club not hitting the ball. Something I had gotten away from reading traditional golf instruction books: Hardcover Great overall story though it is a tragic set of circumstances: Interesting look into the American Dream in early 1920's Atlanta. The emergence of the automobile the klan and one of golf early innovators. Well-written and well-researched it tells the tale of a now-forgotten legend in professional golf. Douglas Edgar was an Englishman who moved to Atlanta Georgia around 1919 to be a club pro. Edgar invented the modern golf swing which involves much less lower-body movement than the popular swing of the day: He died under mysterious circumstances in 1921 just as he was on the threshold of worldwide fame for his golfing performance and teaching. The story alternates between a biography of Edgar and the tale of the investigation into his death: The investigation is told from the perspective of Comer Howell a 20-year old Atlanta socialite who is a cub reporter at the newspaper owned by his father: He also happened to be one of the men who discovered Edgar's body. At first everyone believes Edgar was the victim of an automotive hit-and-run but Howell feels the facts don't add up. The book is told in a novelistic style and is very well put together. It paints a picture not just of golf in the early 20th century but of Atlanta society and the prejudices and politics of that time and place, A wonderful read for golfer and nice read for someone interested in intrigue and a bit of sport/golf history: But on August 8 1921 he was a man dead in the middle of the road the victim conventional wisdom said of a hit-and-run, He was an Atlanta Constitution reporter and heir to the paper's fortune a man frustrated by his reputation as the pampered boss's son, To Howell the physical evidence didn't add up to a car accident: As he chronicled Edgar's life Howell discovered a working-class striver who had risen in the world through a passion to succeed a quality the newspaperman admired. And as he investigated Edgar's death Howell also found a man whose recklessness may have doomed him to a violent demise: Their stories meet in a Southern society of plush country-club golf courses vast wealth and decadent secrets: To Win and Die in Dixie: The

Birth of the Modern Golf Swing and the Mysterious Death of Its Creator.

. Hardcover This was a very good book. J. Highly recommended for golf and history fans. Hardcover  
A great book. It is part mystery and part golf history. Nicely done. J. Comer Howell thought  
otherwise
